Ama-View Tactical Eyewear

Real Time Video in Operational Scenarios

About AMASEC

AMASEC provides the exceptional service of business development, technology scouting and marketing for the Israeli HLS, Cyber and Defense industries, relying on a worldwide network of professional and formal connections and offering access to decision makers in the industries.

Our team combine decades of experience in Marketing and Business Development on the defense and security domain, as well as vast military and para-military experience.

The AMASEC business partners are a variety of companies and technology in this defense and security domain and allow us to provide companies and governments with the most ideal solutions.

We are constantly on the lookout for new technologies and partners that would improve and update our portfolio.
